

Product Information

Battery Voltage Guard BW500

- Monitoring of battery voltages 12 V, 24 V, 48 V or 60 V
- Alarm function under-voltage / over-voltage selectable
- Time delay adjustable
- Measuring voltage and supply voltage are identical

Characteristics

The BW500 is designed for monitoring of battery voltages. Under-voltage or over-voltage can be selected.

Under-voltage:

The relay switches off, if the voltage falls under the limit value and if the delay time ran off.

If the voltage exceeds the limit value + hysteresis, the relay will be activated.

Over-voltage:

The relay switches on, if the voltage exceeds the limit value and if the delay time ran off.

If the voltage falls under the limit value - hysteresis, the relay will be deactivated.
