PROCAL
V5
Calibration & Maintenance
Asset Management Software

PROCAL Highlights

V5

Every calibration counts at Prime Technologies.

ProCalV5 software was developed to provide an unparalleled amount of detail — giving our clients all of the features of a comprehensive quality management system.

Industry first
fully compliant
21CFR Part 11.

Each version undergoes thorough, documented, internal testing and validation before release.

Setting New Standards for Quality Management Practices

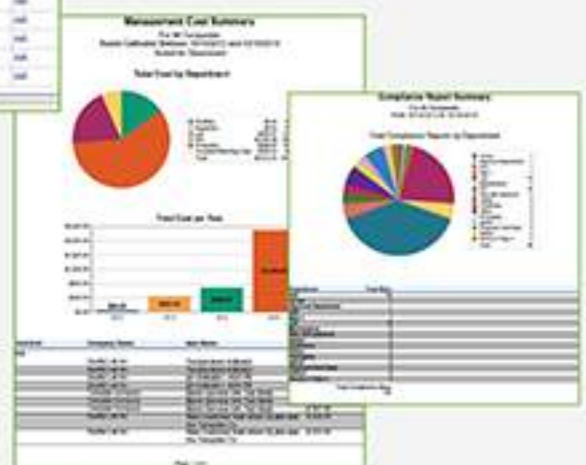

Precision Asset Management

User friendly screens, highly intuitive workflow and advance math functions guarantee superior performance.

Powerful Reporting and Analytics

Many easy ways to retrieve data on-demand for daily work activities and management oversight.

Thousands of Clients... Large & Small!

Major regulated industries across the globe use ProCalV5 calibration management software.

Available in MS Access®, SQL Server® and Oracle® versions, ProCalV5 manages assets for:

- Calibration
- Maintenance
- Qualification
- Commissioning
- Validation

Great Software!

We have been using ProCalV5 for a number of years. Updates are effortless and support is second to none.

Lee Hummel - ISO Calibration Technician, Mars Chocolate North America ELZ Plant

- **Many Others**

ProCalV5 supports many popular brands of documenting calibrators.

100%, End-to-End, Paperless

Are calculators or paper used anywhere in your calibration practices?

Wi-Fi or off-line, our Mobile Workstations provide the complete program interface. Maximum productivity and improved regulatory compliance are guaranteed. Advanced features ensure "end to end" Total System Quality Management.

Excellent Software and Customer Service!

Customer Service is always exceptional. The software has endless features. Extremely flexible to customize.

Miriam Calvo-Gil - Corporate Supplier Quality Manager, KAPCO

PROCAL — Cloud Calibrations DIRECT

Leave the management of software deployment, database maintenance, server validation and IT infrastructure to us.

With ProCal Direct you can instantly access a enterprise class, professionally hosted calibration & maintenance management program via a simple subscription service.

This validated Cloud-based, web accessible solution is scalable for single facility, multi-site or corporate wide requirements.

Wide Ranging Options

There are multiple options available to support the unique asset management requirements for individual company or industry needs. Among the most prevalent are:

- Preventive Maintenance/Workorder
- Parts Inventory
- Shop Administration
- Email Notifications
- Training Management
- WebView – Secure Report Web Access
- Mobile Workstations
- Optional Test Routines
- Data Exchange/ProCal Connector Interface Utilities

Best in the Business!

I found ProCalV5 to be the easiest to work with, validate, and implement. The system is intuitive, flexible, and mature.

Kathlanne Ross - IT Compliance Supervisor at Fujireblo Diagnostics, Inc.

Whether for a single department or entire enterprise, unique individual accounts can be constructed to manage individualized workflow and oversight practices.
